Breathable leather upper

Natural leather provides a high degree of wearer comfort combined with durability in versatile applications.

SRC slip resistance

Slip resistant soles are one of the most important features of safety and occupational footwear. SRC slip resistant soles pass both SRA and SRB slip resistant tests, they are tested on both steel and ceramic surfaces.

Metal free

Metal free safety shoes are in general lighter than regular safety shoes. They are also very beneficial for professionals who have to pass through metal detectors several times a day.

Non-marking outsole

Non-marking outsoles do not leave color marks on the ground.

Removable insole

Renew your insole at a regular base or use your own orthopedic insoles for a higher comfort.
